

Star Force Base 1198

Six-Month Growth Plan Star Credits & the Requisition Depot

COMMAND INTENT

Grow Star Credits into the economic engine of the base: every member earns through contribution, spends on identity, and returns weekly for the rotation. Real money buys credit caches; credits never buy power.

PHASE SCHEDULE AT A GLANCE

- Phase 1 Months 1-2 Make the economy real
- Phase 2 Months 2-3 Social spending
- Phase 3 Months 3-4 Recurring events drive demand
- Phase 4 Months 4-5 Premium & creators
- Phase 5 Month 6 Polish & scale

Status legend: [SHIPPED] live on the base - [NEXT] scheduled - [OPS] operator-managed, no code required.

Standing rules:

1. Credits buy cosmetics, boosts, and access - never moderation influence, story approval, or rank.
2. Every grant and spend is audit-logged.
3. Purchased caches grant exactly their face value - no surge.
4. Rotation items always return; nothing is permanently retired.

Phase 1 - Months 1-2

Make the economy real

[SHIPPED] Cosmetic Lab expansion: three departments - Frames (250-500 credits), Titles (300-900, incl. two command-award-only mission lines), Boosts (XP Surge 500, Credit Surge 750).

[SHIPPED] Full-card frame rendering on Account, Profile, and the header badge - purchases dress the whole card.

[SHIPPED] Weekly rotation shelf: one frame + one title spotlighted per ISO week, deterministic fleet-wide.

[SHIPPED] Operator credit adjustment panel with audit trail.

[NEXT] Star Credit caches in the Requisition Depot (kind: credits): 500-cache at \$4.99, 1,200-cache at \$9.99, 2,600-cache at \$19.99. Face value granted exactly at fulfillment.

[NEXT] Aspirational deep-sink item at 5,000+ credits so veterans always have a goal.

[OPS] Configure cache prices and seasonal cosmetics in the operator Store manager.

Phase 2 - Months 2-3

Social spending

[NEXT] Credit gifting and tipping on stories and lore - authors earn from fans; instant creator economy.

[NEXT] Profile display cases: show off owned cosmetics and trophies.

[NEXT] Group treasuries: pooled credits unlock group banners, titles, and perks.

[OPS] Feature tipped authors on the front page weekly.

Phase 3 - Months 3-4

Recurring events drive demand

[NEXT] Seasonal Cosmetic Pass: limited-edition frames and titles each season; numbered editions for prestige.

[NEXT] Weekly contest entry fees (credits) with merch prize pools from the depot.

[NEXT] Base-wide community goals: pooled credit contributions unlock canon content - a new lore chapter, a sector reveal.

[OPS] Schedule contests and events from the operator console.

Phase 4 - Months 4-5

Premium & creators

[NEXT] Lore rentals: 48-hour access to tier-gated archive content - the bridge between free and paid membership.

[NEXT] Creator program: members sell custom lore bibles and art through the depot; the base takes a revenue share.

[NEXT] ARG campaigns with credit bounties on solved ciphers.

[OPS] Vet creator applications; approve listings before they go live.

Phase 5 - Month 6

Polish & scale

[NEXT] Credit economy dashboard in the operator console: earn/spend charts, inflation monitoring, faucet-vs-sink balance.

[NEXT] Achievement-linked cosmetics: milestone frames earned, not bought.

[NEXT] Referral rewards: credits for recruiting members who stay active.

ECONOMY HYGIENE (STANDING POLICY)

- Daily ceiling on comment earnings to prevent farming.
- One or two aspirational sinks at 5,000-10,000 credits.
- Boosts and speed are purchasable; votes, approvals, and rank are not.
- Purchased credits are exact; earned credits can surge.

Appendix - Credit rates & catalog

Reference sheet

EARNING (the faucet)

Published story	100 credits
Approved lore entry	25 credits
Certified discovery	25 credits
